

St. Albans Park n Ride Stormwater Upgrade, Clean & Clear Program

Lakeside Environmental Group LLC has teamed with Watershed Consulting Associates, LLC to provide survey, site planning, stormwater grading and design details, CAD, and construction supervision for various projects sponsored by the Vermont Clean & Clear Program. WCA provides stormwater modeling, overall treatment design, and project coordination. The stormwater upgrade at the St. Albans Park n Ride, owned by the Vermont Agency of Transportation, was the first project on which LEG provided these design services with WCA for Clean & Clear. The upgraded stormwater treatment facility is a constructed, gravel wetland, described below, that was constructed in 2010. Other Clean & Clear projects are on-going.

Completed treatment facility (June, 2010)
